

voxelcare

We present a new  
**step into the future.**

## 3D Printer Automation Module

Non-stop printing for  
Multi Pellet and Filament printers.

Available as a complete new system  
or as an upgrade for existing printers\*.

## Increase orthotic printing with fewer operator interventions

Proprietary PET  
foil concept

Automatic  
unloading

Up to 3 days'  
production collection  
capacity

Storage for 32  
pellet cartridges

**IMPROVE  
UPTIME**

**IMPROVE  
OUTPUT**

**IMPROVE  
CONSISTENCY**

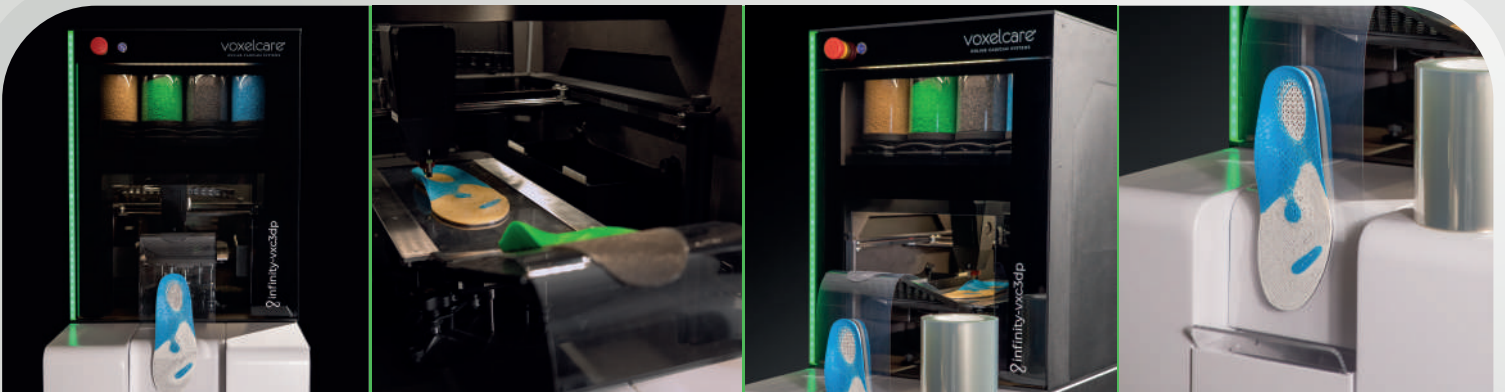

**IMPROVE  
MARGIN**

When demand grows, manual part removal and frequent material handling become the bottleneck

## The Voxelcare 3D Printer Automation Module is designed to **keep your production moving**

**Enabling continuous printing and organised material management** for professional orthotic manufacturing

**Continuous printing.** Via a proprietary PET foil concept  
A production-ready approach engineered to support extended printing cycles and a smoother day-to-day workflow.

### What's included - Automation module components:

#### A) Printer upgrade:

- Automated Z-Axis
- PET foil unit
- Door and rear panel replacement

#### B) Base unit

- Collect printed insoles (up to 3 days production)
- Space to store 32 pellet cartridge

\*Only available as upgrade for V2 units.
