

The smart choice for accessible protection, ready when you are.

No scans, photos or measurements – fit in a single appointment.

Protects prosthetic components and restores basic anatomical shape.

Standard anatomical shape, **trimmed to length** in the clinic.

Stockable or available on demand.

Firm material – durable, hygienic, shape-stable and lightweight.

Secure fit, easy access – each cover is internally designed to fit its specific knee model, secured with screws and magnets.

QuickFit

Our ready-to-fit standard TF cover.
Select the best size, trim to length in the clinic, and your patient is ready to go.

Available in 2 sizes (S,L)

QuickFit+

Extends coverage above the prosthetic knee – including an articulated upper piece for the knee joint – for complete TF protection.

One standard length, trimmed to fit by the clinician.

- Full coverage with **articulated knee joint** piece – preserving full functionality and freedom of movement.
- **Easy partial replacement** – two-piece modular design, replace only what's damaged.
