

Dynamic Foot

F1-S-KIT
F1-M-KIT
F1-L-KIT

Distinctive features

- dynamic and smooth roll-over
- size adjustability
- one foot for left & right

About

The Circleg Dynamic Foot is designed to cover the needs of both active and less active users, through a unique combination of stability, comfort, and energy return.

»» Its adjustable design allows it to cover the great majority of adult sizes by stocking only 3 foot sizes. Made from lightweight yet durable glass fiber and high-performance plastics, it ensures a smooth roll-over and natural feel. The universal cover protects against moisture and dirt. The toe cover allows the same foot to be used for both left and right limb amputations. S, M and L cover all foot sizes, ranging from 21 cm to 30 cm.

Features

Covers

The Circleg cover set is composed of the heel, front and instep cover. These soft rubber parts protect the foot, make it more stable in the shoe and give it its unique Circleg look. All covers are easily replaceable if needed, as they are wear parts which might wear out.

Sole Pad

The sole pad is mounted at the foot's sole and increases the walking comfort for the user by providing a much smoother roll-over. All Circleg feet are equipped with the sole pad and the simple mounting process requires only three screws, which come with the foot.

Cutting lines

The Circleg feet allow a high degree of customization through simple size adjustments. The cutting lines indicate the exact shape for the specific sizes. The Circleg foot can be cut using a common metal saw or even better with a jigsaw.

Technical data

USP	Smart adjustability—just 3 feet needed to fit 10 sizes
	Designed for bilateral compatibility—suitable for both left and right amputations
	Dynamic yet stable
Materials	Body: glass fiber reinforced polypropylene (fibers in the foot are highly aligned in direction of the load)
	Foot covers & Sole Pad: polyurethane
	Foot adapter: stainless steel
Main production process	Compression moulding
Proximal connection	Male pyramid adapter
Packaging	Protective cardboard box 33cm x 21cm x 8 cm
Regulatory status	CE marked, for more details see ‘Regulatory status / classification’
