

KINEGEN.flow

The new waterproof prosthetic knee joint

Comfort, precision and freedom – KINEGEN.flow is ideal for patients with moderate to high activity levels who enjoy swimming, cycling or walking long distances.

With its well-thought-out features, KINEGEN.flow not only impresses in patients' everyday lives, but also in the workshop, enabling efficient care with a high level of satisfaction.

Our KINEGEN portfolio

Highlights for patients

- **Stance flexion:** comfortable gait, high stability
- **End position damping:** gentle extension stop
- **Water resistance:** corrosion-resistant materials and sealed hydraulics enable use in wet areas and in water
- **High resistance mode:** additional safety in water, sand or on grass
- **Free swing mode:** low hydraulic resistance, e.g. for cycling
- **Powerful hydraulics:** for long walking distances and reduced heat generation
- **Low weight:** for effortless walking and reduced strain

Advantages for prosthetists

- **Precise adjustment** via valve screws with clicks and scale; linear adjustment behaviour
- **Easy access to valve screws:** convenient adjustment of hydraulics
- **Easy maintenance** thanks to replaceable bouncing buffers
- **Flexible plumb alignment** thanks to distal adjustment core
- **Durable structure** and **high comfort** for satisfied patients
