

Move as will

Engineered to empower every will.

Technology that redefines **movement boundaries**

Synrise is an **embodied intelligence** leader achieving the deep fusion of perception, decision, and execution. Backed by elite talent from **Tsinghua, Cambridge, and the University of Toronto**, we translate cutting-edge AI into life-enhancing mobility solutions.

Full-Stack Synergistic R&D: 100% In-House Hardware & AI Software

SynchroMind™ AI Core

Achieving total vertical integration from neural algorithms to bionic hardware.

System-Centric Validation

Every innovation undergoes millions of simulations per algorithm update to ensure unwavering logical stability.

Autonomous Evolution

A closed-loop system where real-world technical feedback directly trains the AI engine for perpetual device evolution.

Flexible Mass Production

Seamlessly transitioning from precision trials to global mass delivery with 100% unit traceability.

Why Synrise R&D?

Precision

Real-time motion adaptation powered by proprietary AI.

Scalability

Industrial-grade manufacturing lines designed for rapid global deployment.

Stability

Multi-stage inspection loops and rigorous stress-testing.

Co-Create Your Product

What We Can Offer:

World-Class
Tech & Team

Turn Your Ideas Into Reality

Powered by SynchroMind™ AI and top-tier teams from Tsinghua, Cambridge & Toronto.

We Handle Dev, You Own The Brand
Various rehab devices, fully customized to your brand aesthetic.

Your Vision
Your Brand
Your Product

In-House
Production
Max Margins

Lower Costs, Higher Profits

End-to-end in-house manufacturing eliminates outsourcing costs.

Start Your Custom Product
