5280 Prosthetics LLC Internal Smart Vacuum Systems

5280 Prosthetics (Littleton / Colorado, USA) manufacture internal smart vacuum systems that have been devised to simplify installation in the sockets of prostheses. The internal vacuum technology minimises the usual potential leakage points, such as tubes, connectors and adapter plates, that are associated with external vacuum systems. Thanks to smart-app compatibility, the SmartPuck can communicate with both Android and Apple devices. Six different vacuum systems, with a variety of functional parameters, are available and allow clinicians to adapt the prosthesis to the needs of the patient.
