astra Soudure HF **Ortho Comfort PAD Soft Edge™**

The French company astra will be showing their new PAD Soft Edge™ orthopaedic cushion at OTWorld 2018. This registered model is 100% “made in France”, and provides anatomical comfort for the patient and a simple application for the orthopaedist. Its soft edges and comfort-memory foam (phthalate-free) are assembled by means of high-frequency welding (seamless, without adhesive) and make it easy to apply orthopaedic straps.
