GANTER Shoes GmbH

GANTER AKTIV – relaxation and stimulation

The new GANTER AKTIV shoes from the GANTER company (Taufkirchen/Pram, Austria) create their beneficial effect with specially designed pressure points to provide stimulation to the body. The shoe is constructed so as to recreate a natural walking motion. It provides relief for both back and joints, improves posture and tones muscles. The attractive design and the removable cushion sole mean that the shoe can be used to treat a variety of conditions.
