

## New products of 2018

### SIGVARIS GmbH

#### New SIGVARIS business portal, complete with guided tour

Manufacturers of compression textiles, SIGVARIS, will be introducing the retailers and wholesalers at OTWorld to their completely revamped online business portal for compression hosiery. The requisite products can be quickly selected using either the product number or the pharmaceutical registration number. There is a guided tour of all the functions available for newcomers to the system. The compression stockings can be configured step by step, with the sizing, too, done by an integrated calculator. The business portal can be used both on a desktop PC and on a tablet. The set administration fee for orders is waived for orders placed via the business portal.
