The SpineCorporation Ltd New back relief orthosis TechnoSpine

The new TechnoSpine TLSO scoliosis brace will be exhibited at OTWorld by The SpineCorporation Ltd (Chesterfield/Derbyshire, Great Britain). It has been specially developed to minimise posture imbalance and pain in adult scoliosis patients, as well to improve their quality of life. The aim is to facilitate the dynamic rehabilitation process, with a view to improving posture both during and after the use of the brace – and thus to alleviate pain, increase mobility and reduce degenerative changes.

The TechnoSpine TLSO scoliosis brace can be adapted to the needs of each individual user, using a simple assessment procedure and following some easy step-by-step instructions. There will be a demonstration of the product both at the manufacturer's stand and in programme of exhibitor workshops.
